Valuation Options Explained...

All moving companies are required to offer two types of valuation options. Full Replacement Protection and Basic Released Value. While Mammoth has a 3% claim ratio to the industry average of 20%, we still recommend taking additional coverage for peace of mind.

Full Value Protection (see back for pricing)

This is the most popular and because accidents do happen Mammoth will completely cover you with Full Value Protection. If any article is lost, destroyed or damaged while in Mammoth's custody, we will offer to do one (1) of the following for each item: a) Repair the item b) Replace with a similar item c) Make a cash settlement for the cost of the repair or the current market replacement value

Basic Released Value (free of charge)

The most economical protection available is Released Value, since it is offered at no additional charge. However, the protection is minimal. Under this option, Mammoth assumes liability for no more than 60 cents per pound per article. For example, if a 10-pound stereo component valued at \$1,000 is lost or damaged, you would only receive \$6.00 in compensation (60 cents x 10 pounds)
